ADVANCED PEDIATRIC ASSOCIATES OPENS NEW OFFICE IN DENVER'S STAPLETON COMMUNITY

Caring for Infants, Children and Adolescents for Over 40 Years: Advanced Pediatric Associates Announces the Grand Opening of Their New Stapleton Office.

This February Advanced Pediatric Associates will open a new office at 2373 Central Park Boulevard in the Central Park Professional Condominiums. The introduction of the new Stapleton office is based upon a model for pediatric care which combines the benefits and services of a larger group practice with the personalized care of a smaller physician office. Lead physician for the new office will be Dr. Bradley Kurtz, son of Advanced Pediatrics' founder Dr. Michael Kurtz. Additional providers at the Stapleton office will include Dr. Bethany Carvajal, Dr. Amanda Gilmartin, Dr. Alison Auster, and Kimberly Thomas, PA.

Advanced Pediatrics provides primary healthcare to infants, children and adolescents, including well care, same-day acute care, and specialized care for asthma, ADHD, and behavioral health. With office hours Monday – Saturday, Advanced Pediatrics also offers a nurse line and online pediatric health library, so parents can conveniently access information regarding newborn care and illness questions from home. An Advanced Pediatrics' on-call physician works in conjunction with Children's Hospital Colorado After-Hours Service to handle any urgent concerns whenever the office is closed.

Dr. Bradley Kurtz looks forward to opening the new office close to the neighborhood where he grew up. Reflecting on Advanced Pediatrics' long history of success, Dr. Kurtz notes, "The continued expansion is a testament to Advanced Pediatrics' 42 years of excellence in fulfilling its mission of providing the most advanced pediatric medicine in a family friendly setting."

Advanced Pediatric Associates was founded in 1972, and has locations in Aurora, Centennial, Parker and Denver, Colorado. Advanced Pediatrics' new Stapleton office is scheduled to open mid-February. Appointments may be made by calling the Patient Care Line at 303-699-6200. To learn more about Advanced Pediatric Associates, visit their website at: www.AdvancedPediatricAssociates.com.
